*New York,* June 6, 1895

S. Sexton, Esq.,

No. 12 West Thirty-fifth Street,

New York City.

Dear Sir:-

Yours of June 1st addressed to His Honor, the Mayor, has been referred to this Department for consideration and report, and several inspections have been made of the premises No. 4-6 West Thirty-fifth Street, occupied as a stable by W. T. Thorne. The stable was found in an excellent sanitary condition and it seems from the report of the sanitary officers that no action in reference thereto is necessary on the part of the Board of Health. The stable is occupied by only four horses, two of which are owned and used by Dr. Bull and the other two are used in coupés which have a license from the Mayor's Marshal. It was represented to the officers of this Department that these coupés did not stand in the streets regularly or for any longer periods than were necessary in the transaction of an ordinary livery or coupé business. Improper occupation of the streets by coupés, carriages, carts, etc., is not within the jurisdiction of the Health Department.

Very respectfully,

(Signed) Emmons Clark,

Secretary.

Dear Colonel,

There is a boy who sells newspapers on the Corner of Worth St. and Broadway in the afternoon, who stands on the North East Corner, to whom I wish you would call the Health Board's attention. It looks to me as though it were a case of leprosy.

It may not be so, but I have seen it down in the West Indies, and ~~he~~ shows all the marks of it.

Yours truly,

*F. L. Smith*

Mrs. Leavy,

No. 169 East 108th Street,

New York City.

Sir:-

Your complaint to His Honor, the Mayor, was referred to this Department on the 23rd instant. It does not appear from the records of this Department that you have ever made any complaint in respect to the condition of premises No. 169 East 108th Street. The premises were inspected June 26th and the inspector reports as follows:

"There is an opening in the lead waste pipe from the sink on the second and third floors; said opening is closed by a cork, thus allowing foul odors to escape. The second floor water-closet is filthy and the bowl is broken."

An order has been issued and served upon the owner to repair these defects. The inspector in his report makes the following note:

"The janitor informed me that the tenant of second floor has been dispossessed. Said apartments are filthy and are occupied by Mrs. Leavy, the complainant."

This house is built on swamp land and the cellar is cemented

2- Mrs. Leavy, June 26, 1895.

"and drained so that all water that may enter the same can be readily pumped into the sewer."

Very respectfully,

Secretary.

*New York,* July 9, 1892

Messrs. Ruland and Whiting,

Temple Court, Cor. Beekman and Nassau Sts.,

New York City.

Gentlemen:-

Yours of June 29th to His Honor, the Mayor, in respect to alleged nuisance maintained by one of the tenants of the Trustees of the Brooklyn Bridge during the past two years, and claiming that no relief can be obtained from the Board of Health, has been referred to the President of this Department for attention and report direct to complainant. You are well aware that this case has received great consideration from this Board and its officers, and you have on several occasions been informed of their views upon the subject.

The establishment of Luyties Bros. is upon premises owned absolutely in fee simple by the cities of New York and Brooklyn for the purposes of the New York and Brooklyn Bridge, and leased to said Luyties Bros. for business purposes under authority conferred upon said Trustees by Chapter 368, Laws of 1892. The high building known as the Metropolitan Realty Building, Nos. 214-218 William Street and 18-20 Rose Street, takes air and light on its southerly side from Bridge property, which is not a public street. Such being

2- Ruland and Whitting, July 9, 1895.

the fact, this building should protect itself as far as its southerly windows are concerned against smoke or other annoyance that may come from the Bridge property in the legitimate use of said property. The best fuel is used by Luyties Bros. in their establishment, and no unnecessary smoke is produced, and this party has offered to extend the smoke pipe complained of above the Metropolitan Realty Building, provided its necessary attachment thereto is allowed, but this has been denied by the owners of that building.

The question in this case is largely one of property interest and not an important sanitary one, as the building is not used as a human habitation. The Board of Health does not knowingly allow its powers to be used in determining the property rights and conflicting claims of adjoining owners, and in this case you and others have been frequently advised by officers of this Board to obtain a decision from the courts. If the parties complained of have no right to prosecute their business at their present location and in the present condition, a legal injunction could be doubtless obtained without delay. A copy of a communication from the attorneys of the Trustees of the Brooklyn Bridge recently received is hereto attached.

The Board of Health will take no further action in this case until a legal decision has been obtained as to the rights of the parties in the premises.

Very respectfully,

(Signed) Emmons Clark,

Secretary.

Dear Sir:-

At a meeting of the Board of Health of the Health Department held July 9th, it was, on motion,

**"RESOLVED,** That the communication of this date to Messrs. "Ruland and Whiting, Temple Court, corner Beekman and Nassau "Streets, submitted by the Secretary, in reply to their communication to His Honor, the Mayor, dated June 29th, in respect to an alleged nuisance maintained by one of the tenants "of the Trustees of the Brooklyn Bridge, is hereby approved, "as it expresses the unanimous opinion of this Board as to the "case in question."

Enclosed please find a copy of the communication above referred to, which has this day been mailed to Messrs. Ruland and Whiting.

Very respectfully,

*Erasmus Acak*  
Secretary.

Charleston June 20th. 1895

Hon W. G. Strong  
Mayor of New York.

Honored Sir.

I take the liberty to write to you about my wandering son. I will not trespass on your valuable time only as little as possible, knowing that you will sympathise with his sorrowing Mother, My Husband died years ago, and this only son being very delicate had his own way, I fearing to chastise him would make him sicker than he was, so he grew up a wilful boy & young man, and wanted to see the world. I begged and entreated him not to go, but he said that Charleston had lost all taste for him, so he left home about five years ago. I heard from once at Tampa Florida with the circus, but in four years not one line, until to day when

I heard that He was dead, and that He died in one of the Hospitals in New York City. But I became so nervous and heartsome that I forgot the name of the Hospital or street and that he had been kept for two days, to be identified, I will now describe my son Mitchell Brenner is about 5 ft. 2 in; fair skin, blue eyes & dark brown hair, (sun burnt) and very delicate looking, his limbs from his knees to his feet had erysipelas, and at times he had to go on crutches, his accent was very like a North Carolinian or one playing in the Minstrels, He had suffered so much that his face had an aged look, He is an heir to property from my Brother's estate at my death, and I would be rejoiced to see him once more or bring his body home, any information concerning him it will be most thankfully received by his distressed Mother.

Yours Most Respectfully  
Mrs Ann. Brenner.

New York, July 20, 1895

(COPY)

Alois Van Isakovics, Esq.,

No. 449 East 121st Street,

New York City.

Dear Sir:-

Yours of the 17th instant to this Department was duly received, and your letter to His Honor, the Mayor, undated, has been referred to this Department to answer. It appears from the records of this Department that the premises referred to were inspected on the 10th day of July and an order was issued July 12th, requiring "that the connection between the sink and waste pipe in the kitchen be properly repaired and made tight; that the pan water-closet on the second floor be replaced by a new water-closet properly adjusted; that each water-closet be flushed by a water-supplied cistern adjusted over the same; that the cover of the handhole and the running trap of the house drain be secured by a gas-tight joint and the opening of the fresh air inlet pipe be extended to the external air, and that the roof be repaired so as not to leak." This order was mailed July 12th to John B. Haskin, Fordham, who is said to be the owner. It having been ascertained on reinspection that no work had been done and that the order had not been complied with, a notice was sent to Mr. Haskin July 18th

2-A. Van Isakovics, July 20, 1895.

that unless the work was immediately commenced the Board would order the premises vacated. This is the situation at the present time, and no effort will be spared to secure a full compliance with the order. The absence of Mr. Haskin from the city may possibly be the cause of his delay to comply with the order.

Typhoid fever is a disease which is not attributed to defective plumbing by sanitary authorities, but to a typhoid germ received from food or drink. I am not informed as to the terms of your lease, but leases generally require the tenants to make ordinary repairs, and in any case it would seem reasonable that you should make the trifling repairs necessary to the water-closet on the second floor without waiting for the owner to put in a new closet.

The Sanitary Superintendent and Attorney of this Department have been instructed to spare no effort and use every measure within the power of the Board to secure prompt and full compliance with the order.

Very respectfully,

(Signed) Emmons Clark,

Secretary.

Edward Berger, Esq.,

No. 460 Sixth Avenue,

New York City.

Dear Sir:-

Yours of July 22nd to His Honor, the Mayor, has been referred to this Department to answer. Your complaint directed to the Board of Health, dated July 13th, was received at nine o'clock A.M. July 15th, and an inspection of the premises No. 460 Sixth Avenue was made July 16th. The inspector reported "that storm water falling on the surface of area in front of saloon finds its way into the cellar of No. 460 Sixth Avenue, causing the same to be damp. Said area is not drained," and recommending "that the area in front of saloon be graded so as to discharge all surface water into a properly trapped sewer connected drain." An order was issued July 18th in accordance with the recommendations of the inspector, and mailed to Mr. Jacquin, said to be the owner of the premises, on that day. The owner is allowed five days by law in which to commence the work required by the order, and that time has not yet expired. At the expiration of the five days a reinspection will be made, and if the order is not complied with or the work commenced, the Board will proceed to enforce the order in the manner prescribed by law.

Very respectfully,

(Signed) Emmons Clark, Secretary.

New York, August 5, 1895

S. Schmidt, Esq.,

No. 1097 Park Avenue,

New York City.

Dear Sir:-

Yours of July 31st to His Honor, the Mayor, has been referred to this Department to answer. Upon the receipt of your complaint of June 24th an inspection was made of the premises No. 1097 Park Avenue, and it was ascertained that the icebox in the cellar was leaking and discharged into two overflowing pans, and that the cellar was flooded with water. An order was issued June 26th upon the occupant of the cellar, John Casey or Casini, requiring "that the icebox in the cellar be repaired so as not to leak, and waste pipe of icebox made to discharge into a properly trapped, sewer connected water supplied sink." It was ascertained upon reinspection that the order has been complied with and that water no longer is discharged from the icebox upon the cellar floor, and that the nuisance has been, therefore, abated.

Upon an inspection made of the same premises August 5th the Inspector reports "that the lead branch waste pipe of sink in rear of drug store is connected to a two inch main iron waste pipe in cellar by a defective lead saddle; that there is a small quantity

2- S. Schmidt, August 5, 1895.

"of stagnant water in the cellar under drug store; offensive odors  
"arise therefrom." An order has this day been issued and sent to  
Mr. Herschfield, No. 1377 Lexington Avenue, in charge of the prem-  
ises, requiring "that the stagnant water be removed from the cel-  
"lar and the cellar cleaned and disinfected, and that the lead  
"branch waste pipe be properly repaired," which order will be duly  
enforced.

Very respectfully,

Secretary.

New York, August 14th, '95 189

Dr. V. Thompson,

32 West 19th Street, New York.

Dear Sir:-

Your complaint of August 9th, addressed to his Honor, the Mayor was referred by him to this Department to answer, and was received August 12th. The premises were inspected August 12th, and the following is the report of the inspecting Officer.

"The buildings from No. 32 West 19th Street to 6th Avenue have been torn down, and the ground is being excavated preparatory to putting up a large drygoods building thereon. There is a large pile of brick taken from the old torn down buildings, about 6 feet high, 6 feet wide and 200 feet long, which obstructs the street gutter, and all rain water lodges in front of No. 32. At the time of my inspection, there was about one barrel of water in front of premises evidently from the rain of the night previous. I saw Mr. Wm. Germond, who is superintendent of the work. He immediately had one of his workmen bail the water from the gutter in front of No. 32, and dump it on the north side of the street, where there was no obstruction. I saw complainant and told him the place would be kept under observation, and see no more water would be allowed to gather there."

Very respectfully,

(Signed) Emmons Clark,

Secretary.

New York, August 30, 1895

Job E. Hedges, Esq.,

Secretary, Office of the Mayor,

City Hall, New York City.

Dear Sir:-

The anonymous complaint, addressed to His Honor, the Mayor, in respect to premises No. 20 Willett Street, is returned herewith, with the following statement:-

Upon a complaint of the same party, made June 12th, the premises were inspected June 13th, and his statement in respect to the number of persons occupying the premises was found to be incorrect. It was also found that there was a much larger amount of air to each person than is required by law. An order, however, was issued June 21st, for additional ventilation of the premises, and for cleaning and whitewashing, which has been in the more material particulars complied with. The premises have changed owners recently, and the new owner, Solomon Kutner, of No. 4 Baxter Street, promises without delay to put the premises in complete order.

Very respectfully,

*Emmerson Clark*

New York, September 19, 1895

Chas. F. Roberts, M.D.,  
Sanitary Superintendent.

Sir:-

I have the honor to report in regard to premises No. 36  
Willetts Street:

Said premises were inspected by an Inspector of this Department on a citizen's complaint, September 11, 1895, and an order was made recommending improvement in the sanitary condition of the premises. He also reported no stable on the premises.

I visited the premises this morning, and find the facts as stated. There is a congregation on the ground floor in the rear of store, and the room is very much crowded, and in case of fire will endanger the lives of those attending there. I recommend that the complaint be referred to the Fire Department.

Respectfully submitted,

(Signed) F. H. Dillingham, M.D.,

Assistant Sanitary Superintendent

New York, September 30, 1895

Messrs. Sol Dicker and Co.,  
Nos. 199-210 Greenwich Street,  
New York City.

Gentlemen:-

Yours of September 23d to His Honor, the Mayor, has been referred to this Department for examination and report. A complaint was received August 14th in respect to nuisance at Nos. 208-210 Wooster Street, and upon the report of a Sanitary Inspector an order was issued August 16th, requiring "that the nuisance caused by the discharge of steam from the premises into the windows of Nos. 199-210 Greenwich Street be abated." On the 24th of August the Chemist reported that the nuisance was abated. Upon the receipt of your complaint another inspector visited the premises September 25th, and reported as follows:-

"A sheet metal 12 inch shaft, cowl covered, extends about six feet above the extension in the rear, and the moveable glazed sashes in the roof of said extension are left open. These conditions cause offensive odors to enter the rear windows of houses on Greenwich Street adjoining."

On the 26th day of September an order was issued requiring "that the ventilating shaft in the roof of the extension be extended two (2) feet above the roof of the main building and that the nuisance caused by foul odors escaping from open windows in the roof of the

2- S. Ducker & Co., Sept. 30, 1895.

extension be abated." At the end of the five days prescribed by the order the premises will be again inspected, and if the order last named has not been complied with the Board will take the necessary measures to enforce the same.

Very respectfully,

(Signed) Emmons Clark,

Secretary.
