✓ The Johnsonia

Fitchburg, Mass.

W. E. Forbes, Mgr.

Mr. Robt. Admaison

Mayors Secretary

New York, N.Y.

My dear Sir:-

I am a New Yorker
born & raised in Harlem and
I travel out of N. Y. City.

About two months ago I wrote
a letter to His Honor W. J. Gaynor
advising him to try to stop
(some how) the miserable editorials
in the Hearst papers.

I was in Buffalo when our then
President McKinley was assassinated
and when Golgotz was searched he
had upon him five of the Hearst
editorials, three were translated
in lead pencil and in the

The Johnsonia

2

Fitchburg, Mass.

W. E. Forbes, Mgr.

Polish language. Now what I
want to know is

By what method can these
vile & murderously inciting
editorials & cartoons of the rotten
Hearst papers be suppressed?
Gallagher had one (or two was it)
editorial of these papers on his
person.

Are all the public, or rather
are any more of our best office
holders to suffer by this
man Hearst's methods?

I am an Ex & a musician
Can we do anything?

Very respectfully

132 W. 116th St. n.y.c. J. S. Scott
over

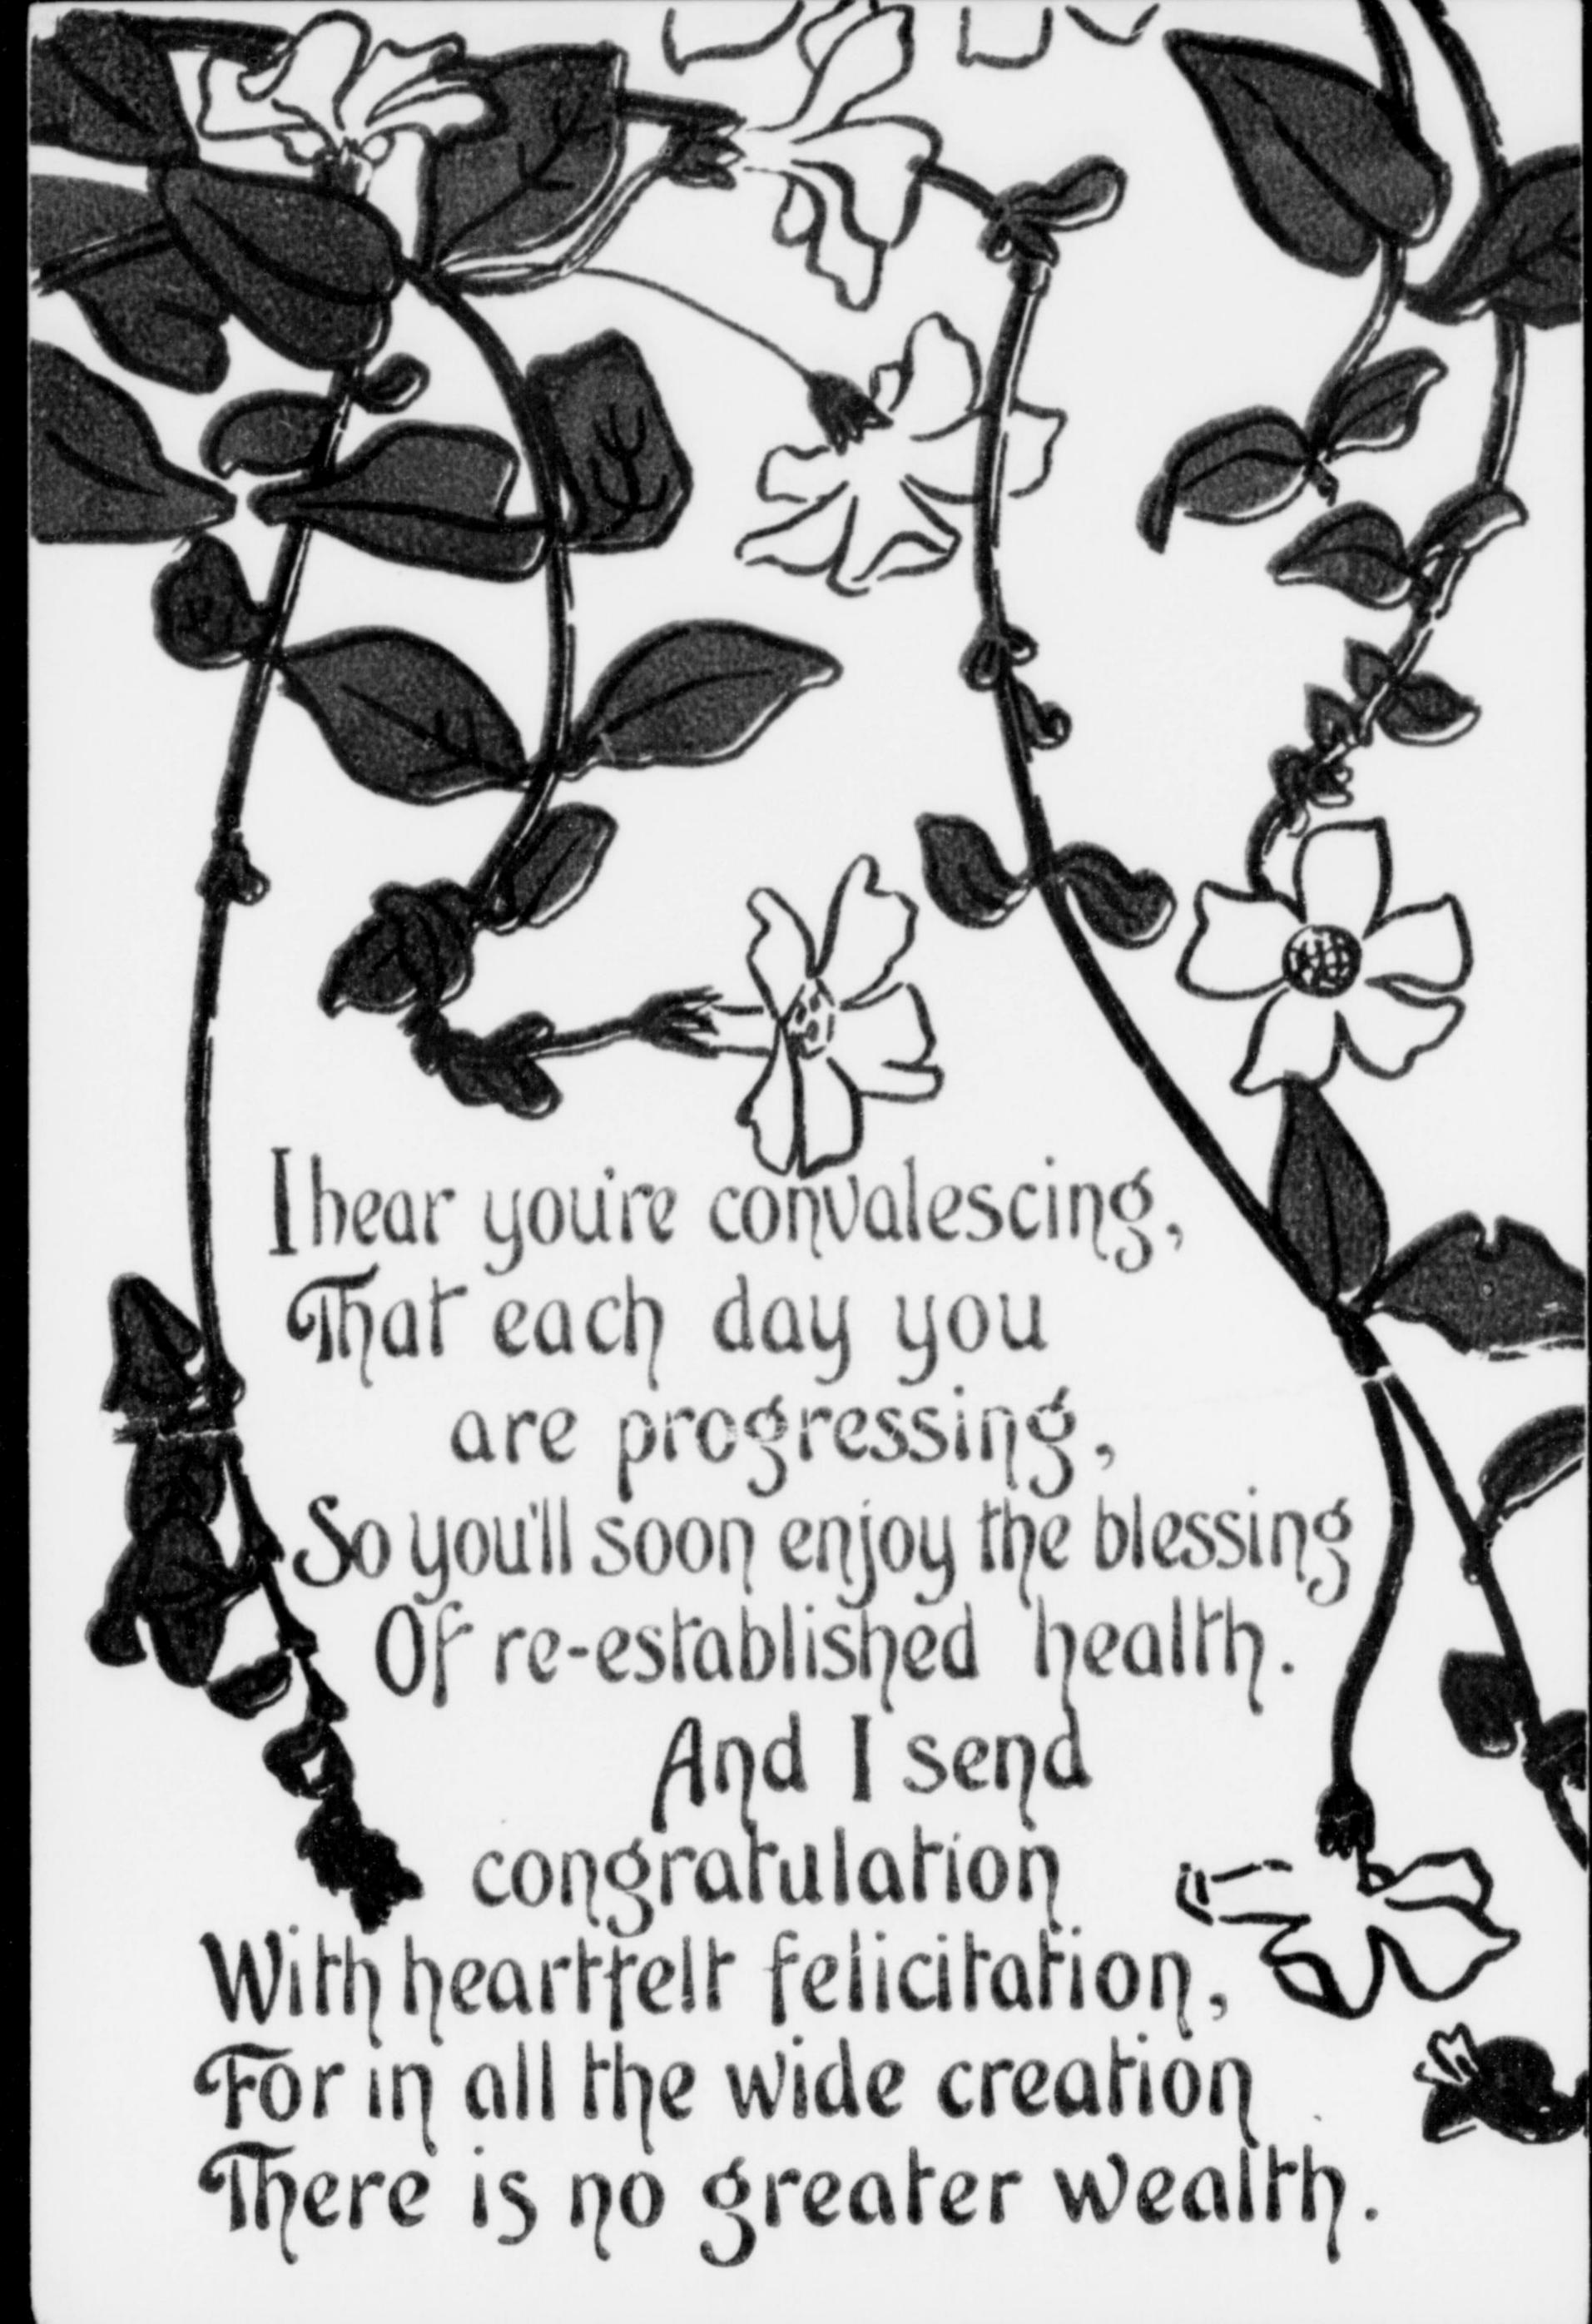

as I will be on the road
for a few weeks yet please
address me to Droguis
Hotel Buffaloe N.Y.

2224 Amsterdam Ave,
City.

Dear Sir, I just a little
bit of tribute from a
humble cit — if you
care to show it to our
next President when
you see fit. With profound
regard to yourself &
glorious "Big Bill",

Sincerely yours,
Charles F. Carty

Robert Adamson, Esq.

I hear you're convalescing,
That each day you
are progressing,
So you'll soon enjoy the blessing
Of re-established health.
And I send
congratulation
With heartfelt felicitation,
For in all the wide creation
There is no greater wealth.

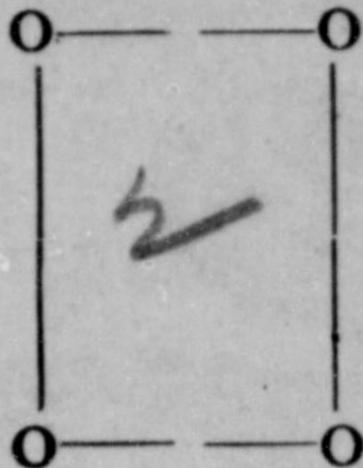

646 E. 18th St.

Hon. Wm. J. Gaynor,
Mayor, New York City

This side for the Address only.

Los Angeles Cal

95.

Dear Sir!

Permit me to congratulate you your familie and the City of New York on your recovery & do this from the bottom of my heart. Although I am a stranger to you personally I assure you I have become very much acquainted with you through Press of the country, and I think you are the most admired person in the land outside of T. R. and I think you ought to be even more so because of the quite and even tenor of your way for if we seek and receive the praise of men, then we have our reward already. Mr. Craynor I wish we did

did not have to depend
on Honesty in Public officials
as the chances are so great
for its going astray and the
public business is so great
to have to depend on chances
Private business dont do it
it demands bonds and security
for positions of responsibility
If we cant have that, let
us at least have direct leg-
islation, the referendum
and the Recall so we dont
have to wait until the office
expires, but fire the dishonest
immediately as we do in private
business. I am glad that
your assailant, nor any other
have been socialists as I
dont want to see my

Principles injured by
such acts. I hope you
will pardon me for
taking the liberty of
annoying you with this
long letter excuse the
poor english as I am
only a foreigner and
a workingman. With

best Wishes to you and
your familie I am
believe me Yours
Sincerely

J. Schaffer
1107 W. 11th St Los Angeles Cal.

Mr. Caynor.

If you can spare a few
moments of your valuable

time to reply to this

I will appreciate it very

much, and preserve

it as a keepsake and

a treasure.

U
Offer of a place in the Pocono
Mountains from Mr. Ryerson W. Jennings,
1410, So. Penn Sq., Philadelphia.

Mrs. Allison

Jaynor

Hoboken

H. J.

My Dear Mrs. Jaynor:

Some time last May I wrote from Mt. Pocono Pennsylvania and asked Mr. Jaynor if he could run up and bring you, if only for a week's end, at the Hawthorn Inn, as my guest. He wrote immediately, and said he would

City Club of Philadelphia

like very much to come
and if possible would avail
himself of the invitation.

Now: I would like
very much for you to bring
him, as soon as he is
able to travel, by that time
I can offer you a cottage
where you can be assured
of the utmost privacy.

I want him to come for
two reasons, first, for my
high regard for himself
and service to his countryman
Second: The air, the water and
surroundings of the Poconos
are, I am sure, better

City Club of Philadelphia

than the Adirondacks, and is more
accessible.

Mr. Edwards who so fortunately
was so near in that
terrible moment, knows me
as the father of Pop Jennings
Class '07 at Princeton.

I am sending you a book
of the Inn & Cottages.

Kindly convey to Mr. Taylor
more than I can say
on paper.

Yours faithfully

Person W Jennings

THE PHILIP H. SAMILSON HOME RULE PROTECTIVE ASSOCIATION, of which Philip H. Samilson is President, a well-known political organization of the Great East Side of the City of New York, whose influence in the past has wielded immense power for the cause of good government, held a special meeting at its club-rooms at 18 East Broadway last evening to take action on the shooting of Mayor Gaynor. Mr. Samilson presented the following resolutions, which were unanimously adopted.

WHEREAS the Almighty in his infinite wisdom has seen fit to nearly take from us Hon. William J. Gaynor, Mayor of the City of New York, and

WHEREAS during his entire and uninterrupted service as a public servant, which began in his early manhood, he had the implicit confidence and support of the people, and

WHEREAS he ever displayed an untiring patience and exercised with unflinching integrity the duties that devolved upon him, and

WHEREAS during all of his distinguished career, he was courteous, patient, respected and esteemed as a lawyer and a conscientious, good and merciful Judge, which endeared him to his associates on the Bench, to the practitioners who appeared before him and lastly as Mayor of the City of New York to all of those who came in contact with him and by his conspicuous ability to the Nation at large.

NOW, THEREFORE, BE IT RESOLVED, that this Association and the Community earnestly pray to Almighty God that the wound inflicted upon Judge Gaynor

by the hand of an irresponsible person may not prove fatal and that his life be spared and that he be permitted to enjoy a speedy recovery and to resume his duties as Mayor.

BE IT FURTHER RESOLVED that this Association extend to the members of his family its heartfelt sympathy over the sad event.

BE IT FURTHER RESOLVED that these resolutions be spread upon the minutes of this Association and a copy thereof transmitted to his family, that another copy thereof be placed upon the walls of the meeting rooms of this Association and that the same be published in the Press of the City of New York.

“The

Electricure”

F. C. Lillibridge,
12 School St., Newark, N. J.

Branch Office,

Consultation Free.

OXYGEN...

The process of respiration is a never-ending action of furnishing by osmosis a constant supply of oxygen; at each inspiration one cubic inch of oxygen is removed from the air and absorbed by the blood, and as we use 350 cubic feet of air in the day, the quantity of oxygen used is about twenty cubic feet, which is equal to about two pounds.

By the use of the Electricure we insure at least three times the volume of oxygen absorbed by the blood that can be taken in by respiration.

After many years of labor in experiments upon the benefits of oxygen upon the human system, this Electricure has been demonstrated to be the most perfect means of furnishing to the oxygen carriers, (viz., the red corpuscles of the blood) the greatest possible amount of this life giving agent.

And while I have been perfecting this device, I am more than gratified to see that other branches of science have been working on the same lines of investigation, until it is to-day a well-settled bacteriological deduction, that oxygen and oxygen alone is capable of destroying the "Tubercular Bacillus."

"The Electricure"

Cures

Blood and Nerve Diseases

McKEE & JOHNSON

Sole Manufacturers

565 Broad Street,

Newark, N. J.

SUCCESSORS TO THE F. C. LILLIBRIDGE CO.

It is idle and worthless, to assume that drugs can "cure" these conditions.

This brings us to the successful treatment of disease by the Electricure process of combustion and elimination by Nature's own agents, Electricity, Atmospheric-Oxygen and Oxygenated-Water, the only perfect natural means for revitalizing the whole system, and thus directing the remedial action to the different depurating organs, but chiefly to the skin.

Few people realize the importance of the skin as an eliminating organ, and the necessity of keeping it in a healthy condition. Through its seven million pores excretion of refuse matter is constantly going on, when in a normal condition, but when these millions of vomiting mouths, laden with body-poisons refuse to work because they are not cleansed, disease is the natural result.

Very few people realize the fact that they breathe in through a healthy skin one-sixth as much air as they do through the lungs, and that they excrete through the pores of the skin, if in a healthy condition, fully a quart of water, laden with poisonous waste material, every twenty-four hours.

"The Electricure"

Expels disease from the entire system by causing the human body to attract and absorb an abundance of oxygen from the air.

Its first effects are:

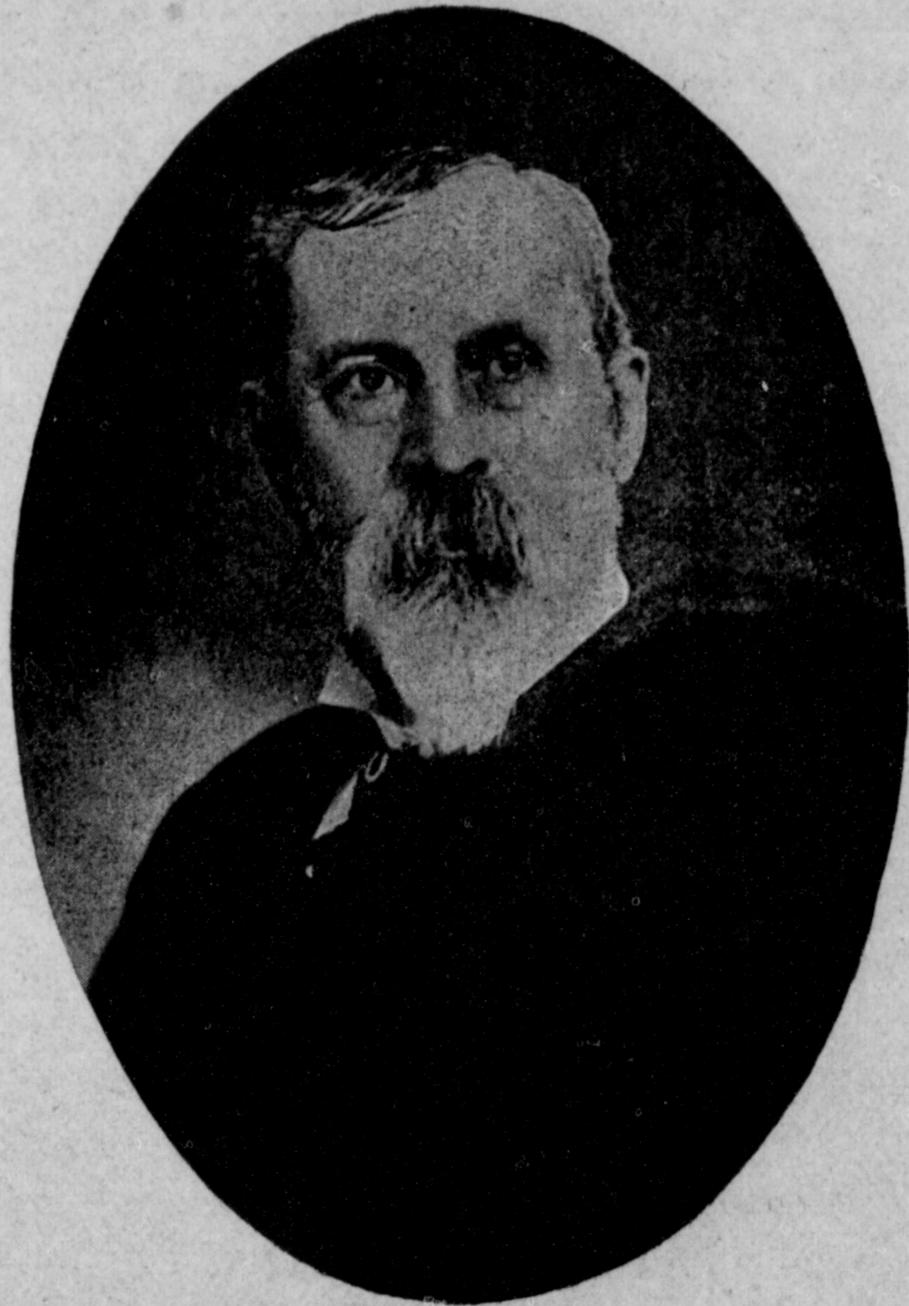

Relief from Pain, Refreshing
Sleep and Increased Appetite.

"The Electricure"

Restores Lost Energy and Nervous Force. This treatment imparts vitality and tone to the whole system without the use of nauseating drugs or medicines, and

Absolutely Cures

Nearly all Acute: and many Chronic Diseases which have heretofore been considered incurable.

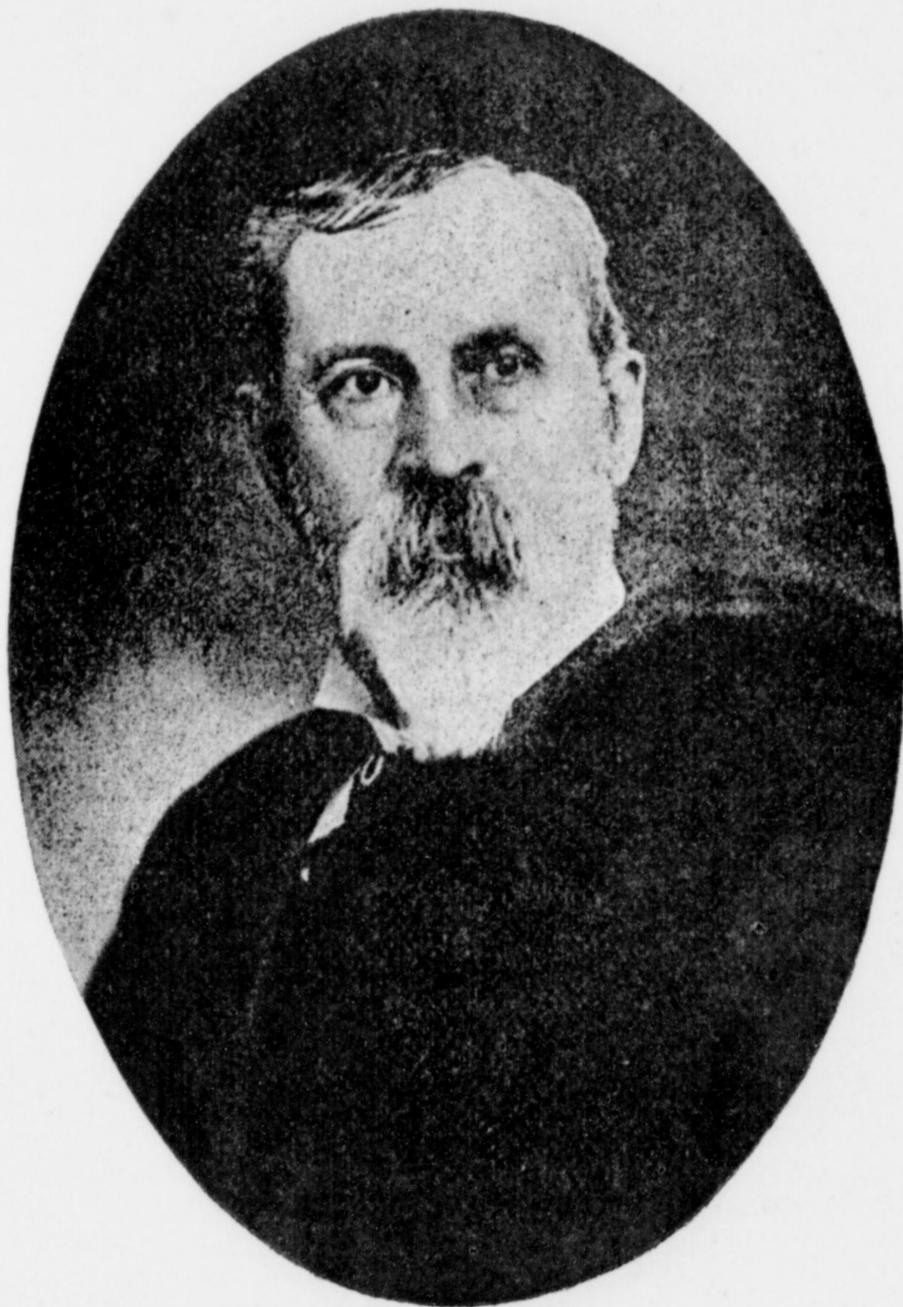

F. C. LILLIBRIDGE
FOUNDER OF
The Electricure Co.

THE *ELECTRICURE* is "from the start to finish" a thermal electrical instrument, scientifically made to create such an electric current that when properly applied to a living body it produces such an action of the skin as to cause it to absorb atmospheric oxygen, by which means all diseases are cured without medicine, and this method of cure we call the *oxy-electro-dor* process, which new word is fully explained in the pages following, and to their attentive perusal we kindly invite all sick and afflicted persons; every man who suffers while he toils; every woman who pines from agony while yet she lives; every child who languishes in misery's lap—one and all, let your ills be what they may, don't despair in the midst of your distress, for here is a sure hope of health from a new life begotten from the air for the eradication of the old diseased conditions by combustion, and for a revitalizing of the whole system by the only perfect natural means, namely, the administration of atmospheric oxygen.

To all classes of impartial investigators, as well as that growing number of intelligent people, who seek to leave their day and generation better than they found it, we cordially

F. C. LILLIBRIDGE

FOUNDER OF

The Electricure Co.

THE *ELECTRICURE* is "from the start to finish" a thermal electrical instrument, scientifically made to create such an electric current that when properly applied to a living body it produces such an action of the skin as to cause it to absorb atmospheric oxygen, by which means all diseases are cured without medicine, and this method of cure we call the *oxy-electro-dor* process, which new word is fully explained in the pages following, and to their attentive perusal we kindly invite all sick and afflicted persons; every man who suffers while he toils; every woman who pines from agony while yet she lives; every child who languishes in misery's lap—one and all, let your ills be what they may, don't despair in the midst of your distress, for here is a sure hope of health from a new life begotten from the air for the eradication of the old diseased conditions by combustion, and for a revitalizing of the whole system by the only perfect natural means, namely, the administration of atmospheric oxygen.

To all classes of impartial investigators, as well as that growing number of intelligent people, who seek to leave their day and generation better than they found it, we cordially

ask for an examination of the wonderful *Electricure* and its grand work in the cure of disease, for the trend of scientific investigation confirms it more and more.

It is no faith cure or necromancy, but is the practical application of the greatest discovery—the giving of oxygen—of this wise age for the cure of all human ills, and all ailments of beasts as well, for the principle affects equally all living kind.

Two distinguishing qualities that make it vastly superior to all other means of curing disease and relieving pain, mark its successful work thus far, namely:

It is safe in its operations, reliable in its effects.

The effects of the *Electricure* must not be confounded with a battery, dynamo or static electricity nor galvanism, in any form that has ever been given to the public; and its operations are not like any electrical or magnetic device as it is a practical application of a law of thermal electrical action, the result of phenomenæ gathered in the field of Nature, around which no fences are, and he who will may enter and dig—truth—with which to bless mankind: hence in comparison with other devices, founded upon the principles of electrical science that have been given to the public, attention is called to this phenomenæ.

1. That its electrical currents are sensible on first application to about one person in ten; on the second, to one in one hundred; and on the third, to one in ten hundred.

2. That by its operation the currents generated are diffused over the surface of the body, causing an increase in electrical attraction to take place through the capillaries of the skin.

3. That the result of its application is to cause the electrically influenced capillaries to absorb more atmospheric oxygen.

The main spring of all life is atmospheric oxygen—and so generally has this view obtained, that during the last half century the claims of oxygen as a curative agent have been growing steadily in favor with the medical world, who has fortified this belief by the use of various expedients resulting with gratifying success in a wide range of diseases. The means employed in these expedients was chiefly the administration of artificial oxygen by inhalation—a process at once complicated, inefficient and expensive, as well as being very greatly circumscribed in its application. And at the present time the best antiseptics, antitoxins and bactericides in learned use are oxygen preparations. These efforts however were a step in the right direction, and most truly in the line of the right natural law, as more and more verified by the growth of Bacteriology by which the germ theory of disease has been established. And who has not felt the invigoration of a night journey in the pure open air; or experienced the exhilarating effects of sleeping beneath the sky on the mountain side? Moreover, people everywhere are traveling in search of the tonic effects that come from a change of climatic conditions—and hence it has come to be recog-

nized as a truism, that *atmospheric oxygen is the real curative agent*, and that just in proportion to its pure presence in our bodies are we blessed with joyous health or cursed with painful disease. So much for the power and efficiency of oxygen as a life-giver and health promoter.

We will now show you the marvelous adaptation of means to ends of the two greatest forces of the universe, oxygen and thermal electricity—the first a principle, the second an agent through whose wonderful medium the mightiest element is diffused throughout a living body.

In the phenomenæ of sickness it is known that the electrical condition of the atmosphere determines the growth of disease, which is a decrease of vital force, and that vital force depends upon the electrical condition of the body for the proper oxygenation, whereby life is maintained; that this condition as a sequence is negative, for atmospheric oxygen which is the most electrical form of matter, is electrically negative. The phenomenæ shows too that nitrogen, hydrogen and other gases which exist in the body, and regulated by its conditions, are electrically positive, and are the hotbed wherein the effect—called disease—breeds, and from the manner of living, these conditions are preponderant, so that generally there are more ailing than healthy persons, hence the oxygenation of the body through the right application of the agency of thermal electricity, can alone surely destroy all disease, and so give perfect health. This method as before stated, we call the **oxy-elec-tro-dor** process, which means to

give atmospheric oxygen by thermal electricity, and consists in the absorption of pure atmospheric oxygen into the circulation and tissues by means of the peculiar attraction produced on the surface of the body and throughout the nervous system by the application of the *Electricure*, which our study of this phenomenæ led us to invent as the best practical device for the certain administration of atmospheric oxygen by electricity, and is a great improvement on all the devices before made for this purpose. It absolutely puts the body in such an electrical attitude from the consequent oxygenation thereby produced that disease cannot exist in it. The rapidity of the process being regulated by the temperature of the cylinder during its application, and the skill of the treatment is confined to wisely adapting the rapidity of the oxygenation to the best interest of the patient.

In construction, the *Electricure* is a mechanically constructed thermal electrical device as portable as the smallest grip; as conveniently arranged for use in all situations, and upon every occasion, as a fountain pen; and is operated without assistance whenever water or its equivalent in temperature can be had; altogether it is a marvel of construction, adaptability and convenience; and is the most **adequate life agent** of the century—having distanced all its eager competitors in the grand race for amelioration of human suffering by the direct application of the greatest forces of the universe—thermal electricity and oxygen, as it kills every microbe in the system.

And as all its effects are tonic and stimulating, it

is the greatest boon to all persons who are *victims of the excessive use of liquor, tobacco, opium, morphine or other intoxicants*, by giving them an increased vitality which destroys their depraved appetite, and thus makes men of them again.

With the oxy-elec-tro-dor process the use of medicines, drugs, mineral waters and stimulants of all kinds are prohibited during treatment, as not only useless, but positively injurious, for this treatment includes more than all their good qualities without any of their bad, hence as an economical, cure-all for family as well as individual use its equal has never been offered to the public; and our appeal for investigation is directed to the most intelligent people in every community, as it is from the good accounts they give of their experience in the use of the *Electricure* that its fair fame has spread.

We now tell you briefly what the *Electricure* does in

CHRONIC DISEASES.

As Paralysis, Rheumatism, Gout, Neuralgia, Asthma and Bronchial complaints, which naturally require time, patience and perseverance, and as the *Electricure* works only by natural law, it cannot go faster than nature. Moreover we do not perform miracles, although some of the cures that have been wrought, seem so from the lack of the comprehension of the law of nature whereby they were performed, for law reigns supreme, although some people are loath to acknowledge it, finding it easier under the rule of their prejudices to apply the term

“miracle” to that phenomenæ they cannot readily comprehend, and so it has ever been through all the vast ages of ignorance and superstition.

LET NO INVALID DESPAIR

Or seek the sea, the mountain or a foreign shore in search of health—perchance to die—when it can be surely found at home by the intelligent use of the *Electricure*, for cures are wrought by it that under the old system of medication are impossible.

We have successfully treated over ten thousand cases, embracing a wide range of complaints, and have yet to find a disease that is incurable by this oxy-elec-tro-dor process, when neither of the vital organs are so far decayed as to be beyond the reach of natural law, and even in all such cases the *Electricure* stops pain, gives a clear mind and a quiet consciousness in the moments of dissolution. It is almost needless to add that medication cannot do this hence we make the point, that *as a means for the amelioration of all physical pain it surpasses everything else in use.*

If you do not read a description of your complaint in the pages following, please write—in confidence—the full particulars of your case, and send to us for free advice, and *you will ever bless the day you read this kind invitation.* All correspondence is strictly private.

Anyone writing either of the parties whose testimonial is contained in the subjoined proofs for verification, will please enclose a stamp for a reply.

More than 10,000 Invalids have been successfully treated and cured by the

"Electricure"

in proof of what we have been telling you.

The following pages contain a few of many thousand testimonials from grateful patients cured by this Wonderful Remedy.

All stimulants that contain two per cent. of alcohol are strictly prohibited while taking *Electricure* treatment.

CONSUMPTION CAN BE CURED.

A very large proportion of those who die of this disease never know they have it. A physician hates to tell a patient he has Consumption. He tells him he has Bronchitis or some other minor lung disease but fears to disclose the real truth on account of the shock the information will naturally produce.

No one who has any reason to suspect that his lungs are affected should deceive himself.

When lung trouble is present Consumption is almost certain to ensue unless the disease is cured.

Electricure is not advertised, but depends wholly upon its merit in curing disease for its recommendation and sale.

LUNG TROUBLE AND CATARRH.

28 Linden Ave., PLAINFIELD, N. J.
McKEE & JOHNSON,
565 Broad St., Newark, N. J. July 29th, 1907.

DEAR SIRS:—I shall always be so thankful to the friend who came and told me about the *Electricure*. He said it was a wonderful thing; and now that I have had experience with it, I can say so, too.

When I was seven years old, scarlet fever left me with catarrh and a weak heart. Mother had never seen a case of catarrh, so mine was left to go on for years, until in time it became very offensive. Then one day a friend told her what the trouble was. I was taken to a doctor and he said it was a very bad case, and the bones of the head had become diseased. He gave me daily local treatments for OVER THREE YEARS, which helped me for a while but never cured me, as it was all through my system. The discharge was very offensive and would often form in hard, green lumps which were difficult to get through the nostrils because of their size, and they would make the nose bleed in the effort to remove them. They also frequently came from the throat which was diseased a long time before it got down on my chest.

In May, five years ago, I had very bad hemorrhages and was kept in bed for three weeks and not allowed to talk. The fourth week I was not allowed to go up or down stairs, the doctor wanting me to go to the mountains and spend the summer; and in the fall he wanted me to go away for an entire change of climate for the winter. I also suffered from nervous prostration for years, caused by the catarrh.

Three years ago I lost my voice so that I did not speak in my natural tone for six weeks; and two years since I had the same trouble again for four months, and with it a very bad cough. At that time I lost twenty pounds in weight in a very short time and looked very badly.

It was then I was told about the *Electricure*, and I purchased one at once in September, 1905. The first month it had a tonic effect, but I did not gain in weight. The second month I gained seven pounds; and at the end of a year I had regained all I had previously lost. I used to suffer a great deal with pains in my chest and lungs, but have none at all now, and have not had for months. I still take the treatments for my throat which was so badly diseased; but my present good condition of health can best be judged from the fact that I am a dressmaker, and I have worked for a year every day but Sunday.

Mother has also used the *Electricure* with the best results. Previous to taking the treatments she was quite weak; but it has strengthened her wonderfully; and she now does a large share of household duties in spite of her advanced age—eighty years old last winter. She says she could not get along at all without *Electricure*.

My friends all tell me how well I look; but that two years ago they did not think I would live very long. I cannot begin to say enough in its favor; and certainly wish everyone who is ill could get an *Electricure*.

Yours very truly,

(Signed) MISS IDA MARTIN.

LUNG TROUBLE.

ELIZABETH, N. J., Sept. 30, 1904.
F. C. LILLIBRIDGE CO.,
NEWARK, N. J.

With the sincere wish that the following facts may meet the notice of others who may find themselves in the desperate condition I was in—I write you of my cure; and you have my permission to publish same if you so desire.

About two years ago I began to experience poor health; and shortly afterwards my parents noticed my gradual decline by my loss of weight, colorless complexion, and weakness. The doctors said I had an abscess on the right lung; but their treatment did me no good and I went from bad to worse, until this spring all my relatives were very much alarmed.

It was on June 8th last that I was induced by my grandmother as a last resort to try *Electricure*. Just previous to that date I had lost sixteen pounds in weight in six weeks. It is a pleasure for me to say that from the first course of treatments I began to improve. My loss of weight stopped, and I began to get heavier. My complexion got clearer with some color, in fact I was gaining all the time in every way. Since I started I have taken seven courses of treatments; and during that time have gained in weight fourteen pounds and now feel like another person, for I am strong once again. Since I started with the *Electricure* I have not taken a dose of medicine; and have only seen a doctor to be examined. He stated my lung was entirely healed.

Although I am only eighteen years old I realize fully what remarkable results *Electricure* has had in my case, and shall always take pleasure in recommending it to others.

Gratefully yours,

MISS CORNELIA ACKEN,
1111 Hampton Place.

GENTLEMEN:—It gives me much pleasure in replying to your recent enquiry as to "how I am getting along" to state that I am now in perfect health—thanks to *Electricure*—and have been so all during this year, in fact have been working steadily since March 1st, 1905.

When I wrote you on September 30th, 1904, I had perfect confidence my trouble was entirely removed by *Electricure*, and my general good health for a year past proves me to have been right; however, to satisfy my parents my lung trouble was cured I underwent an examination again some months since; but the doctor could find no trace of my previous trouble.

Should you desire to supplement this to my previous testimonial I am only too glad to allow you to do so, for I know there are many others suffering as I was; and who can be cured by the *Electricure*, which is such a "Wonder Worker."

Cordially yours,

Mar. 1st, 1906.

CORNELIA ACKEN.

P. S. Have gained thirty pounds since I began use of the *Electricure*.

Electricure treatments are so simple a child can take them.

CHRONIC CATARRH OF BLADDER.

CARBONDALE, Pa., July 1st, 1906.
THE F. C. LILLIBRIDGE CO.,
NEWARK, N. J.

DEAR SIR:—Two years ago my attention was called to the *Electricure* by friends who had been greatly benefitted, in fact cured of various ills by its use.

I had all my life suffered more or less from kidney and bladder troubles which culminated four years before in a long sickness that left me with chronic catarrh of the bladder in the very worst form; and I had given up hope of ever finding relief. I was very nervous and much troubled to sleep enough to enable me to attend to my duties; and had never been able since my sickness to get through 24 hours without washing out my bladder with a solution of boracic acid once or twice during the time.

I was induced to try the *Electricure* treatment and no words can tell what it has done for me in more ways than bringing me relief from the bladder trouble. I have never used the boracic acid or washed my bladder once since taking the first treatment; and am as free from such trouble today as most men of my age. It helped me to sleep as I had not done before in years. I gladly recommend it to any and all persons suffering from any physical ill, for I truly believe, that used with care according to directions it will help or cure any ill of the flesh that is curable; and I tender this testimonial wholly unsolicited in the hope that it may incline others to try it as I did.

Yours very truly,

R. P. DODGE,

Manager Hotel American, Carbondale, Pa.

(Formerly of Hotel Bennett, Binghamton, N. Y.)

P. S.—You are at liberty to use the above in any manner you may choose.

R. P. D.

Electricure is a family doctor. It saves its price in a very short time in doctors' bills. It saves the cost of medicines. It revitalizes and reinvigorates the whole system. It induces refreshing, restful sleep. It takes away "that tired feeling." It is worth its weight in gold—and it weighs six pounds. Hundreds of people who own the *Electricure* would part with everything else they possess before they would let *Electricure* go, and they are not backward in saying so.

PARALYSIS.

FLEMINGTON, N. J., Feb. 26th, 1906.

McKEE & JOHNSON,
NEWARK, N. J.

MY DEAR MRS. McKEE:—It is a pleasant duty to write and tell you of the benefit I have derived from the *Electricure* treatment; and you have my consent to use this letter in any manner you choose, for I know there are many people suffering as I did who would esteem it a favor to have the *Electricure* brought to their attention; and I certainly hope this tribute may be the means of inducing others to try this wonderful treatment.

It was in September 1904 when I suffered from a second Paralytic stroke—a very serious one which involved my entire left side as well as my speech—so that it was nearly impossible to make myself understood. I was entirely helpless and had been in bed three weeks with no hope of recovery when you suggested to my daughter that the *Electricure* be given a trial. As under the doctor's care I had no progress, but had grown weaker, her consent was all the more readily obtained, although considering what had been done for me, it was only in the way of a last resort.

The first time the *Electricure* was applied it worked wonders, for within 30 minutes I was able to articulate so that I could be plainly understood; and more wonderful still, during the rest of the same treatment my strength increased so that I could raise the bed covering with my left hand. It is needless to state that I continued with the treatments persistently; and at the expiration of a week's time I was able to walk and was downstairs and improving rapidly. Within three weeks of my first treatment I surprised my family by mounting a ladder and picking pears; and I have remained in perfect health from that time to this, although I am now 72 years old.

Previous to this illness I had also suffered almost continually with backache and headache; but the *Electricure* treatment also cured me of those troubles and I have never experienced them since.

I cannot say enough in favor of the *Electricure* and no one has money enough to buy my instrument could I not replace it. Our gratitude and thankfulness are ever yours for bringing it to our attention.

Very sincerely yours,

PETER M. LA RUE.

Anyone can use *Electricure* who is not entirely helpless.

ASTHMA.

LAMBERTVILLE, N. J., June 1, 1907.

McKEE & JOHNSON,
565 Broad St., Newark, N. J.

DEAR SIR:—It is with much pleasure that I take this opportunity of telling you what the *Electricure* has done for me.

Previous to August last, in which month I bought the *Electricure* through your local agent, Mr. Butterfoss, of Barbertown, N. J., I had suffered for twenty-eight (28) years with Asthma. I had been treated by the best doctors for years without any benefit, and my condition got much worse as time passed. At night my suffering was intense, for it was impossible for me to breathe freely, and I could not sleep. During these attacks I could not lie down, and my son had to be up with me night after night.

I had tried so many doctors and different kinds of treatment, that when Mr. Butterfoss told me about the *Electricure* and what it had accomplished in many severe cases, I was very doubtful, being of the opinion that my case was of too long standing for anything to relieve. However, after much persuasion, I bought one of the instruments, and used it faithfully, following the directions you sent me. You can imagine how surprised and pleased I was to find that after a few of the treatments my attacks got less severe; and after the first few courses of treatments my bad attacks disappeared. I am so pleased to say now that I can sleep as well as ever, and am improved in health in every way, although now over fifty years old. For this reason I take the occasion to recommend the *Electricure* to anyone similarly afflicted. It has certainly done wonders for me; and I do not doubt it will do as much for others. I remain

Gratefully yours,

(Signed) MRS. MARIA MARTIN.

Most doctors are opposed to *Electricure*, possibly for the reason that it takes many good cases out of their hands, and relieves or cures where they have failed to do either. This, however, does not hold true of all, for our orders from the Medical Profession are on the increase, and we take pleasure in acknowledging the fact that a goodly number of doctors are speaking in high terms of *Electricure*.

INFLAMMATORY AND SCIATIC RHEUMATISM.

256 Clifton Ave., NEWARK, N. J.
August 2d, 1907.

McKEE & JOHNSON,
565 Broad St., Newark, N. J.

DEAR SIRs:—I am a firm believer in the wonderful benefit to be derived from *Electricure* treatments in cases of Rheumatism. Considering the severity of my case, the length of time I suffered (no one can realize how much), and that no hope of cure could be offered to me by doctors, it is not to be wondered at that I feel most grateful the *Electricure* was brought to my attention, for all hope of ever being a well man again was gone.

It is now nearly four years since I was taken with the disease, which developed quickly into both sciatic and inflammatory rheumatism. The cause is difficult to trace, because I had previously been in good health; but for some time I had worked in the hot damp basement of a piano factory which I think had a great deal to do with it.

The doctors seemed powerless to afford me any relief, and under their care I steadily got worse instead of better. For two whole years I was laid up, not able to do anything and suffered continually pains that cannot be described. I was then living in Washington, N. J., and tried many remedies recommended by my friends in my efforts to get relief, in fact I spent the accumulated savings of years in trying to find a cure.

I heard of the *Electricure* in April, 1906, through a friend, who asked your representative to call on me. I bought one immediately and after being shown the method of treatment, which is very simple, I continued faithfully with the treatments; and to the surprise of both myself and friends began to improve. You will recall that you saw me some time in June, 1906, after I had been using the instrument about two months, and probably remember that it was quite difficult for me to get around, however, I was so much better that I was able to remove to Newark and accept a light office position. I continued the treatments until the following August, about four months in all; and then discontinued them because I was entirely cured—a very good reason you will admit.

I wish to say that since April, 1906, when I bought the *Electricure*, I have not taken a single dose of medicine; and in that item alone I have saved the price of the *Electricure*, not to mention doctors' bills.

I am at present employed by the Erie R. R. as station agent; and feel and look as well as ever I did in my life. Since starting the treatments I have regained some 30 pounds and now weigh over 160 pounds. When you saw me on the 22d ult., you could hardly realize it was the same person you saw last year, and my cure has been quite as much of a surprise to many others.

You have my permission to refer anyone suffering with rheumatism to me, and I shall be pleased to let them know in more detail what the *Electricure* has done for me.

Yours very truly,

(Signed) A. F. GOULD.
(formerly of Washington, N. J.)

It does not require an expert to show one how to use *Electricure*. Can you read? Yes? Then you can use *Electricure* with as much success as anyone.

NERVOUS PROSTRATION.

227 Castle St., GENEVA, N. Y.
February 24, 1907.

McKEE & JOHNSON,
Newark, N. J.

GENTLEMEN:—I take this occasion to mention my case as I am only too pleased to encourage all sick people to try *Electricure*.

In February, 1906, at which time I was about 46 years old, I was taken sick with a nervous breakdown. I had one of the best doctors at my home until the middle of March following, when, as I was growing worse, I went to a sanitarium and took medicine, salt baths, and different forms of electric treatment; but did not get any better; so, in July, I came home, very much discouraged. My head ached constantly on top and at the back of the neck, and I was so very weak. I had no appetite; was sick all over and could not sleep a moment during the day and only half the night, and many long nights not that.

In the early part of this winter a friend told me of the *Electricure*, so I sent for one; and from the very first treatments I began feeling better; and now, after taking the treatments for two months, I am a well and happy woman. I used to be so nervous that it seemed to me all my best friends were laying plots to do me some great wrong; but I know it was not so, they were all of the kindest.

You may use this letter in any way you please; and I hope it may be the means of inducing others to try it.

I remain,

Respectfully yours,

(Signed) CORNELIA HENION.

The *Electricure* must not be compared with any form of battery or instrument depending on cells that must be frequently replaced or recharged to keep in working order. It is totally different from Galvanic, Static or Farradic electricity. It never requires to be recharged and will last a life time with ordinary care. The only parts liable to wear out are the flexible cords connecting the rheostat and electrodes, and they can be repaired for the insignificant sum of twenty-five cents, or a new set can be secured for \$1.00. A set of cords used with care should last from five to ten years.

Electricure cures chronic cases where doctors, medicine and specialists have failed, and we can prove it.

HEART TROUBLE AND RHEUMATISM.

BAPTISTOWN, Hunterdon Co., N. J.

July 22d, 1907.

McKEE & JOHNSON,

Newark, N. J.

GENTLEMEN:—I am not able to express my gratitude for the wonderful good the *Electricure* has done in my family. It is a very simple treatment and whenever any of us do not feel just right I at once apply the *Electricure*. My husband, the children and myself have all used it, and all have been greatly benefited.

We got the *Electricure* through your agent, Mrs. C. A. Butterfloss, who at that time strongly recommended that it be tried for our daughter Katherine. It was also recommended to us by others who knew of her bad condition, so in August last year we bought one and commenced the treatments under the direction of Mrs. Butterfloss. Katherine was then eight years old; and she had been sick for a year with what the doctors said was rheumatism and valvular heart trouble. She was in a serious and very weak condition, being under the care of two doctors and was taking their medicine every two hours without showing any improvement; but we stopped the medicine and commenced giving her the *Electricure* treatments.

With the first course of treatments she began to gain; and from that time on improved very fast. After taking the treatments for three months she had entirely recovered; and had gained ten pounds in weight. She is now in perfect health and as strong as the other children. During last winter she and her two sisters were taken with the whooping cough, and Katherine came through it best.

I think the *Electricure* is a wonderful thing; and I feel everyone should know about it.

Respectfully yours,

MRS. E. R. ROBERSON.

Simplicity is the word that can be most properly applied to *Electricure*. Remarkable cures have been made thousands of miles away. All that is necessary is to follow directions sent with each *Electricure*, and anyone who can read can do so and secure as good results as they would under our personal supervision.

ASTHMA AND NEURALGIA.

THE F. C. LILLIBRIDGE CO.

TO WHOM IT MAY CONCERN:

About five years ago I took a very severe cold and it resulted in an attack of Asthma, of which I had been a great sufferer, having tried many physicians only to get temporary relief, I sent for Prof. Lillibridge, and he pronounced it a very severe case, in fact I was so bad, every time I breathed, I would whistle through my nose, and could hardly get my breath. The professor gave me a strong course of treatments, and it entirely cured me, and never had it since.

About two years later I had an attack of Pneumonia, and the same course of treatments, over my left lung, was entirely cured, and never had it again. I consider Dr. Lillibridge's *Electricure*, the greatest discovery of the age.

Very truly yours,

J. M. VAN ORDEN,
of The Van Orden Corset Co.,
Newark, N. J.

A book of Instruction is supplied with each *Electricure*, giving explicit directions for the treatment of all curable diseases.

RHEUMATISM.

791 Newkirk St., JERSEY CITY, N. J.

THE F. C. LILLIBRIDGE CO.

DEAR SIR:—Your *Electricure* treatment is a great success. I was in bed unable to move. It has done much for me, as I am now well and at business, and shall be pleased to tell anyone suffering with rheumatism what I now tell you. I had been under the doctor's care two months prior to you giving me the treatments, and had had no sleep for five nights, and my life was despaired of by the attending physician, who dared not give me more medicine as the disease was going to my heart. It has done for me what medicine can never do. Have recommended it to a great many, and in every case it has proved successful. I am ready and willing to tell anyone what it has done for me. I cannot say too much in its favor.

Respectfully yours,

SAMUEL A. ARCHIBOLD,
Inspector of Police.

SIX MONTHS LATER.

I still certify it is your *Electricure* treatment that has done me good. I have had no rheumatism since.

Respectfully yours,

SAMUEL A. ARCHIBOLD.

LOCOMOTOR ATAXIA.

PLAINFIELD, N. J., Aug. 8th, 1905.
THE F. C. LILLIBRIDGE CO.,
NEWARK, N. J.

DEAR SIR:—For years I have been afflicted with what a number of physicians diagnosed as Locomotor Ataxia. After doctoring for years, and trying many treatments without a particle of relief I was compelled in 1895 to give up active work owing to nearly total disability, having gradually lost the use of my limbs.

In March, 1900, I had a bad fall. Going about the house I lost my balance, falling heavily to the floor and injuring the end of my spine. I was confined to my bed seven weeks in consequence; and afterwards found it difficult to walk at all, and then only with the help of crutches. I began to lose the use of my right hand, could scarcely write at all, and in getting about I was compelled to use a wheel chair and in fact could not sit in any other but the wheel chair and an invalid chair without the severest pain. I began to feel discouraged and thought I should never again see a well day.

In 1904 a friend kindly offered me the use of the *Electricure* for a time, being sure it would help me. I began a course of treatments and not long after found that many of the symptoms I had were disappearing. I began to miss the severe pains I had been suffering with for years. Gradually I began to grow stronger, have more confidence, and was able to go up and down stairs with help. I began to gain in flesh until the present time and now I weigh about 175 pounds and can truly say I haven't felt so well in years.

I can now go up and down stairs alone, go about without help, and I am looking forward to the time when I can go about without the use of crutches or wheel chair. I feel certain that the *Electricure* has helped me thus far, and by the persistent use of the treatment I hope to be again restored to perfect health in every particular. I shall be ever thankful to my friend who brought the treatment to my notice.

Gratefully yours,
(Signed) CHAS. E. MAGER,
88 Jackson Ave.

Write us and tell us your troubles. We will state candidly whether *Electricure* can help you or not. You can depend upon what we say, for it is our desire to place the *Electricure* only where it can do good. This is our method of advertising. We know that practically all who are cured by this treatment, will speak favorably of it to their relatives and friends. We can also refer you to those in your own neighborhood who have thrown away their medicine and depend upon *Electricure* to cure their ills.

RHEUMATISM.

GLENWOOD, PA., June 8, 1904.
F. C. LILLIBRIDGE CO.,
NEWARK, N. J.

GENTLEMEN:—Such wonderful good has come to me through the *Electricure* that I feel it is the greatest boon that could be given to sufferers from every physical ailment.

Two years ago I was suffering from Sciatic Rheumatism; could not walk without crutches. I went to the Scranton Hospital for examination. After two months' treatment a consultation of physicians was held, and I was then operated on for "a floating kidney."

For 18 months I remained practically a helpless invalid, sometimes unable to get out of bed and at best unable to stand on my feet for five minutes. My physician said I would never be well, and there seemed no hope for me in any way.

In this condition I was taken to your office to try the *Electricure*. My first treatment was on the 14th of May. After four weeks of treatment I am now able to walk all over the city, have gained ten pounds, and feel so wonderfully improved that I can find no words to express all I would like to say for the *Electricure*.

You are at full liberty to publish this letter or refer to me any patient who may wish to learn more of the *Electricure*. (Signed) MISS ALICE CADDEN.

GLENWOOD, Pa., Feb. 28th, 1906.
THE F. C. LILLIBRIDGE CO.,

GENTLEMEN:—The testimonial I wrote you in June, 1904, just after I had been cured of Sciatica by the *Electricure* treatments, has prompted many suffering in a similar manner to write me asking the present condition of my health and if the cure effected was permanent. It is for that reason I am writing you at this time, desiring to supplement what I said then.

I have had no recurrence of my trouble, and am now, and have been ever since my previous letter, in good health, so that I am able to work and go whenever and wherever I please. While my former suffering can never be forgotten I am now in such good health that it is nearly impossible to believe that only 20 months ago I was in such a desperate condition; but the treatments cured me so effectually that I have never taken a dose of medicine since; and I can most emphatically repeat what I said then—that I consider the *Electricure* to be the greatest boon that could be brought to the attention of suffering humanity.

I can also state that several of my friends and relatives in this vicinity—who know best what it has done for me—have purchased instruments for their own use, invariably with the most gratifying results; and I take pleasure in recommending it to those suffering from any disease whatever.

ALICE T. CADDEN.

PARALYSIS.

Statement by Mr. Lillibridge.

In August, 1876, on the 22nd day the writer had a Paralytic Stroke, while being one of the managers of the U. S. Life Insurance Company at that time, John E. De Witt was president and Dr. A. Huntington was assistant medical examiner and is now Chief Medical Examiner for the New York Life, he, and a Mr. Marvin took me from the Hotel to St. Luke's Hospital, then at 56th Street and 5th Avenue, and the officers of the St. Luke's put me on to a water-bed, and afterwards told me, they never put a patient on a water-bed, that they thought would ever get off alive. I was as helpless as a child, six months old, and could neither speak, walk or feed myself. If anyone has any doubts about my condition, would respectfully refer them to Dr. A. Huntington, who probably well recollects my helpless condition since he never expected to see me again, when he left the hospital.

My brother came down from the old homestead after I had rallied within six months, expecting to take me home in a coffin, but instead I accompanied him. During the next seven years I placed myself under the care of the best medical talent this country could produce.

I found nothing to help me, and about this time, I had the chronic diarrhoea set in and I had so many friends that had Paralysis and the chronic diarrhoea, and took them off, I supposed it would be my final ending. It continued for ten years more, and finally I could not stop it, hardly dared to get out of sight of a toilet room, as I had no control of my bowels. My pulse had not beaten to exceed 53 beats per minute, and intermitted every third or fourth beat, but I was the most anxious about the diarrhoea, and if I could stop that thought I would be a happy man. I had tried Compound Oxygen, and almost everything else, and had almost become disheartened, when I discovered this system of treatment, and it stopped the diarrhoea in a few courses and when I had used it for five or six weeks it restored my pulse to normal 72-74 per minute. When I began taking the *Electricure* treatment I weighed 182 pounds, and before using it six months I weighed 227 pounds, and found I measured $2\frac{1}{2}$ inches less around my waist than I did when beginning the treatment. It is the greatest blood purifier that was ever discovered, as I consider my blood as pure as it was when I was five years of age, had it not have been that I was in a railroad accident some five or six years ago, where I injured my paralyzed hand, and which would have had the use fully restored, the same as the other.

F. C. LILLIBRIDGE.

BLOOD POISONING.

JERSEY CITY, N. J., May 15th, 1906.
THE F. C. LILLIBRIDGE CO.,
NEWARK, N. J.

DEAR SIR:—I give you herewith an account of what the *Electricure* has done for me so that you can use it to bring the treatment to the attention of others, as in my opinion, judging from my own case and several others of various diseases that have since come under my observation, there is nothing to compare with the *Electricure*.

On Tuesday, February 20th last, I had the misfortune to run a meat hook into my right hand, and was careless enough to wait about two hours before going to a surgeon to have it treated. Consequently blood poisoning set in and on the following Friday my arm was swollen and discolored to the elbow, with very severe pains up to the shoulder. That day I went to the surgeon four times and as the lancing brought no relief, and I was suffering intensely, my brother persuaded me to try the *Electricure*, which I did at 1 o'clock in the morning. Soon after the treatment was applied I could actually feel the pain leaving my arm and shoulder; and after a little time the swelling began to go down. It relieved me greatly at once, which seemed very wonderful to me. I continued with a course of five treatments at the end of which time the swelling and pain had entirely disappeared. Considering the fact that the doctor afterwards told me there was only a slight chance of my recovery, you can understand why I have such a high opinion of the *Electricure*.

Yours very truly,

Signed) HENRY PETERSON,
462 West Side Ave.

PARALYSIS--ECZEMA.

In 1890 I was stricken with paralysis of my right arm and limb, which extended over the center of my body. I tried many doctors without any relief. I could not talk, was speechless. This paralysis lasted until about 18 months ago, when I heard of the *Electricure*. I bought one, and directly after I began to use it I could feel the blood circulating where there had been none since I was first stricken. In about a month I began to talk, and to regain the use of my body. In less than six months I found myself entirely cured. I had, of course, lost manhood, which was completely restored. No amount of money could buy this instrument from me if I could not replace it. My daughter of 14 years old had tonsillitis from her birth, and I could get no cure for her. In two months' treatment she was cured. This instrument also cured me perfectly of Eczema, which had spread nearly all over my body. My cure in all respects is complete and permanent. I believe this instrument will cure any disease by removing the cause of it.

JAMES CURTIS.

Clipping from Denver Post, December 28, 1903.

VERTIGO.

DENVER, COL., January 7, 1904.

GENTLEMEN:—I was troubled with swimming head, so much so, that at times I was compelled to sit down, and had been thus annoyed for five years, being frequently incapacitated from attending to my duties in the District Attorney's office. I was so nervous as to be unable to sleep most of the time. After using the Electricure for two months I was entirely relieved, and am now free from any physical ailment, and enjoy perfect health.

My wife had been troubled with enlarged varicose veins, rheumatism, and a complication of disorders for more than twenty years. She was an invalid during all that time, having rheumatism during the whole period. She had used all kinds of medicines and all the various known treatments without avail. About a year ago she got the Electricure, and took the treatments regularly, as directed. In thirty days she experienced great relief, and is now about thoroughly cured; but she still uses it to advantage whenever she feels in need of it. If I could not replace this instrument no money would buy it from me, as I consider it the best and surest remedy ever devised by man for human ailments.

(Signed) GEORGE W. MEANS.

"ELECTRICURE" THE FAMILY DOCTOR.

BROOKLYN, N. Y., August 5, 1903.

F. C. LILLIBRIDGE CO.,

NEWARK, N. J.

DEAR SIR:—I feel it my duty to write and tell you what good the Electricure has done me. I have been ailing for the last twenty years, and about eight years ago our family physician told my husband I could live only about twenty-four hours, that I had a large hole in my lungs. In the month of March, 1901, my nerves got so bad that my family doctor said he could do no more for me. I thought at times I would go crazy,

My sister was hurt in a trolley accident, and it shattered her nerves so badly we didn't know what to do. She was in the Jamaica Hospital for a month. When she came out she was not much better. She called on my sister, Mrs. Sauls, 217 Walnut Street, Newark, N. J., and found out that she was using the Electricure, and went to F. C. Lillibridge and was told he could cure her. She took one course and found it had cured her nerves, and bought one. I sent to my sister, asking her to please send her Electricure to me to try for my nerves, and, in fact, other troubles, such as indigestion. I had to diet myself; I could not eat a hearty meal without pain. She sent it to me in 1901, and the first five treatments cured me of nervousness and indigestion.

I thought what was good for me was good for my children. I tried it on my youngest daughter Eva, and cured her in five days. My husband, also the lady that lived up stairs thought I should call in a physician, and said I would never forgive myself should the child die,

and I finally consented to call in the family doctor, and he pronounced it a genuine case of Scarlet Fever, and asked me what I had done for the child, and I said I had used the Electricure, and he remarked he would have nothing to do with the case. I thought the child was very bad, and he rushed out of the house. We sent for another physician and he pronounced it Scarlet Fever, and asked me what I was doing for the child, (I had learned something by former experience) and I said, only home remedies, and he said the fever was broken and to continue with the remedies I had been giving, and I asked him to call in the morning, but he said it was unnecessary, but I insisted it would be more satisfactory to me, and when he called the next day the child was setting up in bed. He then remarked that he gave me the full credit for the cure, as he had not prescribed for it, which I consider scored one for the Electricure.

For sore throats, rheumatism, colds, in fact anything I have tried it on, it has been a success. If my Electricure were the only one, and I could not buy another, you could not buy mine for a thousand dollars, I prize it so highly. I think every home ought to have one, and I want Mr. Lillibridge to advertise it so that everybody will know what a wonderful thing the Electricure is.

If anybody wishes to call on me I should be pleased to talk with them. I consider myself cured, and have saved that \$30.00 I paid for my Electricure over and over again. I have not seen a doctor in two years professionally,
Yours respectfully,

MRS. G. STADTLER,

1193 Gates Avenue, Brooklyn, N. Y.

"ELECTRICURE" NEVER WEARS OUT.

519 Industrial Trust Bldg.

PROVIDENCE, R. I., March 11, 1907.

THE F. C. LILLIBRIDGE CO.,

NEWARK, N. J.

DEAR SIR:—I take this occasion to tell you that my *Electricure* that I purchased of you in 1898 still does the work. I had an attack of gravel this week and was taken in meeting the other night with pain from the same and it grew rapidly worse after I got home. I applied the *Electricure*, and in fifteen minutes after I had applied it I was relieved, the stone passing from the kidney to the bladder. It came on again before it finally got into the bladder; but another application fixed it all O. K.

This is the second time I have had such an attack, and have been able to relieve it promptly.

Yours truly,

(Signed) JOHN E. WILBUR.

PNEUMONIA.

JERSEY CITY, N. J., October 1, 1906.
THE F. C. LILLIBRIDGE CO., NEWARK, N. J.

DEAR SIR:—I have now got so much faith in the *Electricure* that I must tell you what it accomplished in my family. Several months since my daughter Katherine, who is between 4 and 5 years old, was stricken with a severe attack of pneumonia. From birth she had not been a strong girl, always ailing more or less, so that when she was taken with pneumonia the doctor could offer us no hopes of her recovery.

It was on June 2d last when the doctor said she only had a few hours to live and that it was useless for him to call again. At that time I did not own an *Electricure*; but my brother had one, and in desperation we decided to try it. The child for three days previously had not had any sleep, but soon after the *Electricure* was applied she rested quietly; and after two treatments the disease was broken, and the fever reduced to normal.

From that time until the present she has continued to improve wonderfully, so that now she is a perfectly healthy child with rosy cheeks in much better condition than she was previous to her illness; and as strong as any child of her age.

I can truthfully say that I attribute her recovery to the *Electricure* alone, and I would not now be without one in the house for anything.

Yours truly, (Signed) H. PETERSON.
No. 462 West Side Avenue.

RHEUMATISM.

NEWARK, N. J., May 15th, 1906.
THE F. C. LILLIBRIDGE CO., NEWARK, N. J.

DEAR SIR:—I have obtained so much benefit from the use of the *Electricure* that I take much pleasure in giving you my unsolicited testimonial, so that you can use it to the advantage of others if you so desire.

I have been a great sufferer from Rheumatism for many years; and my attacks have been particularly bad for several weeks in the Spring and Fall each year, so that I would have to leave my work and put myself in the doctor's care, as the pain I suffered was intense. This winter I had been laid up for eight weeks, a good part of the time in bed, and my doctor could not give me any relief. On April 1st I was persuaded to give up all medicine and try the *Electricure* which I did, with really remarkable results.

I had only taken three treatments when the pain I had constantly suffered was gone; and after the third course of treatments I was able to return to my work, continuing at it until this time without the slightest return of the Rheumatism or the least sign of pain. I feel now in better physical condition than I have for fifteen years past, and have every confidence that I am permanently cured. As this has been effected without the aid of a single dose of medicine it is all the more remarkable to me; and it is a pleasure for me to recommend the *Electricure* to anyone afflicted.

Yours very truly,
EDWARD NULTY,
366 Central Ave., Newark, N. J.

Extracts from Recent Letters Received.

On the preceding pages we have given a number of testimonials which have been sent us entirely unsolicited. It will doubtless be noticed that most of them are in New Jersey and adjacent States where *Electricure* is best and most favorably known. We wish it to be understood that each statement has been carefully verified before being printed. *Electricure* is sold everywhere, and we give below a few extracts from letters received within the past month from various places.

From British Columbia:

"I still continue to improve. Shall be a walking advertisement of what *Electricure* can do. My case has influenced four others to buy *Electricures* already."

From a broker in Rhode Island:

"I fully believe in the efficacy of *Electricure*."

From a saleswoman in Illinois:

"I am now getting such restful sleep, that my insomnia is gradually fading from my memory. I was, oh! so doubtful at first; but now am grateful, indeed. I am always speaking in its favor to my friends."

From a lady in Connecticut:

"I began to improve even with the first treatment; and with each course I note my strength returning. My only regret is that I could not have had *Electricure* many years ago."

From a miner in Colorado:

"My rheumatism is so much better now that I am back at work. You will get a few orders from my friends here."

From a society woman in New York city:

"My doctor cannot credit it even yet; and really it does seem miraculous, after spending so much money for five years only to grow worse. I can now walk out, drive and do a day's shopping without being tired; and to think it is only four months since I started the treatment. My doctor says my circulation is fine; but of course I know that, for I am never troubled with cold limbs. I value my instrument at thousands of times its cost."

Extracts from Letters—Continued.

From California:

"I bought an *Electricure* of you in April, 1906, and it has done me lots of good. The doctors pronounced my case to be a cancer; and one doctor (a cancer specialist) treated me for two years. I heard of your *Electricure* and got it; and now I have no further use for doctors."

From Ontario, Canada:

"Would not be without it (*Electricure*) for many, many times its cost. How simple it is, and yet how effective. I hope the time will soon come when everybody will know what it can do."

A prominent physician and surgeon says:

"I have watched the results secured from *Electricure* treatments in a case of Pulmonary trouble. They were remarkable. The *Electricure* is most certainly a wonderful revitalizer."

"THE ELECTRICURE" finds every weak spot; removes the cause of your trouble and revitalizes your whole body. If you have any doubt as to the truth of this statement, take an early opportunity of trying it; and you will be made sensible of a power in it you could not have anticipated. You will have a vitality you seldom ever felt, and all this result without using any medicine whatever.

No bad consequences result from its use. It has never given aid or comfort to death, for its active force is the mainspring of all life—OXYGEN.

Don't fail to try it, and so do yourself a good you never knew before, and which will grow better with your years and repetition.

Respectfully yours,

McKEE & JOHNSON.

TREATMENT AT HOME

Read the Following True Statement

The Electricure Co.,

Dear Sirs—Previous to May 1st last year I worked for the Public Service Corporation as motorman for about 14 years (off and on), but at that date was compelled to give up work because of inability to continue. The company granted me a long leave of absence, anticipating, no doubt, that I would not live to return to work. I had been troubled with a constant cough for years, and, gradually declining in strength, was advised to go to the country to see if the change would benefit me.

I came across the founder of the Electricure, and he explained to me the simplicity of the instrument, telling me it would kill every microbe in the body, stop the waste of the lungs, give me an appetite and make me sleep, and as I was discouraged was willing to try almost anything to get relief. The company had given me a vacation for five months, but I never thought I would be able to return. I commenced the treatments on June 1st and followed directions to the letter, and the 1st of October reported at the car barns for work. The physicians told my mother that my right lung was entirely gone and the left one badly affected, and that I could live only a short time, but since my first treatment with the Electricure I have never missed a meal and have a fine appetite all the time. About the last of December or the first of January, when we had those big snowstorms, and it taxed the company to keep the cars running, as many of the motor-

men were being laid off by sickness, the company kept me at work for 90 hours a week for two weeks in succession, and it would require a man of steel and vitality of a mule to stand that kind of work, with the thermometer ranging from 8 to 20 above zero. I have never been laid up from sickness since I began work October 1st, and have gradually gained in weight, and as I have bought an instrument the founder says if I do not get killed by accident that I am good for 40 years and will not have occasion to be laid up by sickness. I can cure myself with one treatment with the instrument. For nearly two month you have no idea what a relief it has been to me not to have those spells of coughing and raising almost continually, and that almost entirely disappeared and I feel like a new man. I can hardly realize what a change has come over me. If he can cure me in the condition I was in ten months ago he can cure anyone who has vitality enough to undergo the first reaction: I give this unsolicited, with the hope it will be the means of saving thousands from that dreaded disease. "Tuberculosis or Consumption."

(Signed) PAUL A. BRABBAN.

TO WHOM IT MAY CONCERN

A little over 17 years ago I discovered a remedy to cure myself of Chronic Diarrhea. This trouble followed a Paralytic Stroke and the Electricure cured me in two days. As I had it for nearly ten years and no physician that tried could give me relief. I began testing the Electricure for various ailments and never made a failure. I have treated scores of patients for "Tuberculosis" and never had a failure, and now, after 17 years' practice, and treating nearly 8,000 cases person-

ally, we place on the market a positive cure for that dreaded disease "Tuberculosis," and think we have solved the great problem. I sold out my business to McKee & Johnson, 565 Broad street, Newark, N. J., and retired some three years ago on account of my having both my feet run over by a heavy auto. giving myself up to the study of the instrument, and at the request of friends and patients have decided to open a branch office at my residence, No. 12 School street, Newark, N. J., and will treat a limited number of patients. I will say I do not know what it is to make a failure in any case, provided I can have the case at the start, and with the instructions we give with each Electricure sold there is no necessity for a failure. With the HOME TREATMENT you can save lots of expense by being at home and treating yourself, and be among your friends.

F. C. LILLIBRIDGE.

P. S.—If convenient for you to do so, it would be well to come to our rooms and take a course of five treatments, as you would by that time become familiar with them, and then you could keep in touch with me, and if you follow instructions you would be thankful that you ever saw this article. Terms \$2.00 for each treatment, or \$10.00 for the course. If instrument is purchased will rebate 50 per cent. or \$5.00 from price. Call for literature. CONSULTATION FREE.

GUARANTEE

If directions are followed and you are not satisfied at end of the course, I will refund your money.

THE REFORMER.

Before the monstrous wrong he sets him down--
One man against a stone-walled city of sin.
For centuries those walls have been a-building;
Smooth porphyry, they slope and coldly glass
The flying storm and wheeling sun. No chink,
No crevice lets the thinnest arrow in.
He fights alone; and from the cloudy ramparts
A thousand evil faces gibe and jeer him.
Let him lie down and die: what is the right,
And where is justice, in a world like this?
But by and by, earth shakes herself, impatient;
And down, in one great roar of ruin, crash
Watch-tower and citadel and battlements.
When the red dust has cleared, the lonely soldier
Stands with strange thoughts beneath the friendly stars.

Edward Rowland Sill.

TO WILLIAM GAYNOR

The English and the French, to flagellate a crime,
Have the same word: Horror!
And this word, or rather, this cry of fury,
Cry of pity for the victim,
Cry of disgust for the abettor,
We all have screamed it yesterday with the same heart,
Of the same unanxious voice!

The English and the French have to name you
The same word. If in writing it differs,
In both languages, it can be spelled
In five letters whose brief sound is similar,
The mayor.... le maire!

The English and French, to designate the right,
Have the same word: Justice...
For our two nations this word is not factitious;
It serves the base of the edifice
Of their grandeur, and both believe in it!

And it is because in you, the mayor the just man,
In you the man of duty,
Who thinks before acting, looks before seeing,
Acting well, because he sees precisely,
The French have found the Good Mayor, the Friend,
Who the other morning rose among
Millions of voices, American voices,
Protesting under the great heaven,
To wither the crime and his sisters the Hatreds,
The cry of horror fraternal!

You will recover, Mister Mayor!
Of the pain your prodigious vitality will conquer
Today bed ridden, tomorrow strong, New York hopes!
You will recover! yes! yes! The murderous bullet
Did not burst the brains nor reach the heart...
And when he has kept his heart complete, head complete,
All wounded, sooner or later returned to the field of honor!

You will return, Mister Mayor!
We will go for you in a throng to the hospital!
And recovered of a blow very near fatal,
You will know what it is to be popular!
We loved you yesterday, and we will love you
Tomorrow still stronger, and under the quiet heaven,
A moment saddened, we will bring you back
In triumph to the City Hall!

In the meantime, to the patients, to the wounded
That a trifle sometimes, a flower or a smile, appeases
The suffering we bring pressed in our fingers,
Trifles that their lips kiss,
In remembrance of the present days, of the past days,
Accept, if you please, the humble French flower!
And for a long while yet,
O! good Mayor Gaynor

In seeing you standing your French can say:
"By the man with the great golden heart inspired by Wisdom,
"by the Elect of their choice,
"For the people's happiness and the maintenance of their laws,
"God protect the Empire City!"

A. BOLLAERT
