"penetration is but partial, and in
"some cases the chief injury has
"been inflicted by the use of the

Q I may ask you this! what an effect
an attempt would have upon a
child of 10 years of age as far
as ^{the} physical condition was
concerned a day or two after.
A I simply say it doesn't necessarily
interfere

Q If you did say there may have been
a different effect in her physical
condition if this had been full
penetration?

A I say so now; it depends upon the
amount of violence used.

Q On the same point I ask you this
question, I now read from section
212 of the same work

"Medical evidence in cases of rape
is seriously affected by circumstances
over which the physician has no
control. One of the most impor-
tant of these is the want of an
examination at a sufficiently early
period to afford useful results.

28

In genuine cases where rape has

POOR QUALITY
ORIGINAL

been really attempted, the local
marks of violence are often extremely
insignificant, and consequently
soon disappear, a slight contusion
of the genitals, a laceration of the
Hymen, or a trifling discharge of
blood, are the sole indications of
the transactions, and may within
forty eight hours, be no longer present.
Hence it is seldom possible for
the medical examiner to make
any useful note of the marks
of violence upon the person, the
disorder of the clothing, &c. which
are usually prescribed by authors.
The dress has been smoothed or
changed, the marks of injury have
disappeared, and all that remains
is perhaps a conspicuous stain upon
a chemise, alleged to have been worn
at the time of the assault. It
is stated by a celebrated author,
who has had much experience
in such cases (Casper), that in

29

POOR QUALITY
ORIGINAL

fifty eight cases, which had been
required to examine, the time that
had elapsed from the alleged com-
mission of the rape, varied from
three weeks to one year. In connection
with the injuries above alluded
to, the victim of rape, particularly
if young and a virgin, often
manifests by her manner of walking
is: by keeping the limbs separated
that she suffers pain in the genital
She is also apt to complain of pain
in passing her urine or in going
to stool. These signs are not usually
most conspicuous immediately
after the act of violence, and
apart from aggravating causes,
may be expected to decline from
day to day. Is that not true?

Answer

Q If this girl had been penetrated
to the extent of lacerating the
hymen in the manner you have
stated, and produced such

30

8/26
31

Injuries as you found indicated at the time, would you have expected the day after the alleged penetration occurred that she would have been able to walk from her house to the house of the prisoner the very next day? without apparent signs of fatigue or pain.

A. I should certainly say that a day or two afterwards there would be more or less pain, and more or less difficulty in walking.

Q. You recognize also that in children of the age, of particularly of the complexion that there is a disease which presents almost all these features of violence do you recognize that fact?

A. There are many diseases

Q. You recognize such a disease as Leucorrhoea and ^{gangrenous} ~~gargeros~~ inflammation of the vulva?

31 A. Yes I have seen them many times

937
32

Q Does not this occur spontaneously
in young children
A Yes.

Q If the ports are scratched, as a result
of itching does not the wound
from manipulation produce
an appearance of the genital
ports, that are often mistaken for
evidence of violence?

A I have never seen it mistaken
for violence

Q Have you not heard of such cases?
A I have heard of children inflicting
injuries on themselves but
never such a case as that.

Q I will read you the 223 section
of Wharton and Stille's
"Leucorrhoea and gangrenous
inflammation of the vulva are
diseases which often arise
spontaneously in young children
especially of the poorer class,
and are due to bad diet melan-

epidemic influences, In the minds
of anxious relatives they may
awaken suspicions of violence
with intent to commit a rape
and sometimes form the occasion
for criminal prosecutions, against
innocent persons for the sake of
gain. I now ask you if you
have ever in your practice seen a
case where the manipulations
of the clitoris itself by reason of
Leucorrhoea gangrenosa of the
vulva has produced signs upon
the genital organs which have
been mistaken for an attempt
at violence.

A. Never seen such a thing in my life
If in your readings have you not
seen such cases stated by authors
A. Yes.

Police Justice

All persons present the examination proceeded.

Bernard Schickman, aviator
called on the Post of the defense.
being duly sworn deposes & says

Where do you reside
A. 61 Matt Street

What is your business?
A Physician

Did you make an examination
of this girl Julia Candiano?
Ayessii

Q When did you make that examination?
A I cannot recollect the exact date
- when I examined that girl

Q About how long after it is alleged
she was injured by the prisoner?
A They told me it was about the
4th day after.

Q What did you discover?

A I discovered an irritability of the
genital parts, an excessive redness
that is an unusual redness, I also
noticed a slight festure at
the seat of the hymen, although
I could not examine the hymen
very well, on account of irritability
of the parts, the girl didn't let me
examine it well enough, so that
I could make a perfect statement
of the presence, or absolutely absence
of the hymen, all that I could
see it was not in a perfectly
normal condition.

By Mr. Stoenig

Q And it had been destroyed?

A That is a question which is very
hard to answer, it is in a some-
what abnormal condition, but

37

whether it has been produced by
some improper artificial violence
or not. That is ~~the~~ thing that is
quite hard to say.

By Mr. Butts. Alfto Farnwell

Q. From the appearance of the parts as
examined by you, was or was not
the inflammation, the appearance
of these parts such as would lead
you to believe that this condition
was produced by something else
than copulation, than an act of
connection between the man
the defendant ^{and} this child?

A. From the history of the case, when they
entered my office, they at once
told me the history of the case
that the girl has been violated by
a man, so that this alone suggested
to me that it was produced by
copulation, but to say positively
that it was produced by copulation
that would be impossible for me
to say.

Q You have been subpoenaed here by the people here you not?

A I don't know from whom I received the subpoena.

Q You have not been subpoenaed by the prisoner, you didn't make any examination for the prisoner of the girl did you?
