Does 9 MM gun resemble a Beretta-Luger
So it is possible to demonstrate sighting of shells in Court

Det. Joseph Reich

Background + Qualifications

Jul 21, 1965 - at home - call at 10.15 P.M.
goes to 34 Pct. - arrives at 10.45 P.M.

at 34 Pct

74 + 76
Mark for Id. {
Show to witnesses {

He receives from Det. Gussman - 34 Pct
E#75 - 2d
1) a shotgun pellet (on Wm. Parker)
E#74 - 2d
2) a 32 Cal. bullet (Re Wm. Harris)

Also he receives, a 45 Cal. Automatic pistol (E#12)
plus a clip containing 3, 45. Cal. Cartridges
from Det. Jolly & men with Det.

E#76
Mark 3 Cartridges for Id. & show to witnesses
E#76

W leaves 34 Pct & goes to Robin heading.
Travis he goes to Lard & gives gun (E#R) to
Det. Meagher for dusting - negative

He then goes to Ballistics Sq. with gun, etc.

At Ballistics Sq. he sees Det. Scaringe &
receives from Scaringe: 1) evidence found at scene
and 2) evidence taken from body of Dec. at autopsy
and also 3) a clip (E#26) containing 4
45. cartridges. - These 4 cartridges are now
2 separate exhibits: 2 Cartridges - E#26A + 26B - in
2 (bullet, + shell) - E#13 - in
test also

He examines 4 Cartridges - finds Extractor
marks on all 4. Extractor marks on shell casing
of each cartridge

He uses 2 of them 4 Cartridges and test shots
from gun (Ex 12). then test shots & 2 shells are Ex # 73 & 74

Have him explain how test shots are fired the

He then assembles all 45 Cal evidence from Dr. Seng
consisting of: (Ex 58) 1, 45 Cal, bullet from body of the
(Ex 68) 2, 45 Cal, bullets recovered from Dr. S.
consists of bullet marked "J" (found in 165 ft) & bullet
marked "J1" found in apt. across St. from ballroom
& (Ex 66) 3, 45 Cal, shells found across from Dr. S.

He compares Ex 58 under Comparison microscope
as vs. test bullets (Ex # 73)

{ At this point have him describe in detail
the mechanism & what happens to bullet when it goes thru
barrel of gun }

Results of Comparison of Ex 58 & test bullets Ex
Conclusion - Ex 58 fired from Ex 12

Comparison of Ex 68 & test bullets

Results & Conclusion - Bullet "J" fired from
Ex 12. Bullet "J" too deformed

He compares E 66 (345 Cal shells scene) vs

test shells from E 12.

Result & Conclusion - (E 66) all 3 shells fired
from E 12

On Oct. 25, he receives a 45 Cal. bullet found at
scene by Det Kelly & Scaringe (E 69)

He compares the E 69 vs test bullet (E)

Result & Conclusion - E 69 fired from E 12

Now offer in Evidence as to Hayer:

E 12 (Gun)

E #76 (3 Cartridges in Clip of E 12)

E 58 - (45. bullet from body of Dec)

E 68 (45 bullet marked "J" page) -

E 66 (3, 45. shells found scene)

E 69 (45. Cal. bullet found scene Dec 25)

Imp →

On Oct. 23, he obtains 2 45 Cal Cartridges of the
exact same manufacture as those in clip marked "A" (E 26)

& places them in E 12 & gets Extractor marks

on both Cartridges by manually Extracting them from
E 12 - How W explain & demonstrate this

→ Mark these 2 Cartridges for 2d E #77

W then compares Extractor marks on these
2 Cartridges (E #77) against Extractor marks
on 2 Cartridges from Clip found in Dec (E 26)

(4)

Result & Conclusion: (~~Ex 47~~) 2 Cartridges
found in clip in pocket (Ex #26) were at one
time in chamber of Ex 12 & were extracted
from Ex 12.

also - he compared extractor marks on 3
45. shells found at scene (Ex 66) vs extractor
marks on shell casing of 2 cartridges found in
clip in his pocket (Ex #26).

Result & Conclusion - all have same extractor
marks + 2 cartridges found in his clip were
in same gun that ejected shells found at scene (Ex 66)
namely Ex 12

How W testify & demonstrate that clip
found in his pocket (Ex #26) fits into Ex 12.

→ How W demonstrate how Ex 12 is loaded
& fired etc.

also all 6, 9MM shells found from same gun

on March 3, he rec a 9mm shell (470) - he compares
the with other - Conclun - this (470) also found from
same gun.

→ Established a German 9MM Gel - & that amateurs could
have been fired from a German gun
